The IM Server receives and stores the message. The ISM informs the CSCF about the incoming message. Then, the CSCF creates a NOTIFY SIP message.
SIP Server
The SIP server receives the message and forwards it to the IM Server where the user was previously registered.
MESSAGE
From Janne to Jose
ISM/
MMSC
CSCF
(SIP server)
SIP: NOTIFY
To: jose@nokia.com
From:janne@nokia.com
Event: Message (Voice-mail)
Contact: sip.messagecentre.nokia.com
The User subscribes to its local CSCF to be aware of any possible new event.
SIP: SUBSCRIBE
From:jose@nokia.com
The local CSCF notifies the User about the incoming message and from where it can be picked up.
