700

CSI process {
Process-Id
Configuration for CSI measurement reference signal of 1 or 2 ports
Configuration for Interference measurement resource
Configuration for periodic or aperiodic CQI and RI reporting (note that this includes periodicity for periodic reports, sub-band configuration etc. but there is no PMI reporting configuration or codebook configuration here)
Measurement restriction for CSI measurement reference signal – optional
Measurement restriction for Interference measurement resource – optional
Power ratio between measurement and demodulation reference signal
Rank restriction - optional
}
