Image Control
This application monitors the characteristic response of the display screen. When a video is playing, it computes the gamma value of a given location on the image and displays it below. To adjust the gamma LUT, edit the file gamlut.txt
Done
Start
Computed gamma
Time to compute frame
Use brightness lut
Use color temperature lut
Adjusted Brightness
Adjusted color temp
Image Grid Coordinates
x = 342 pixels
y = 98 pixels
Port
0x378
