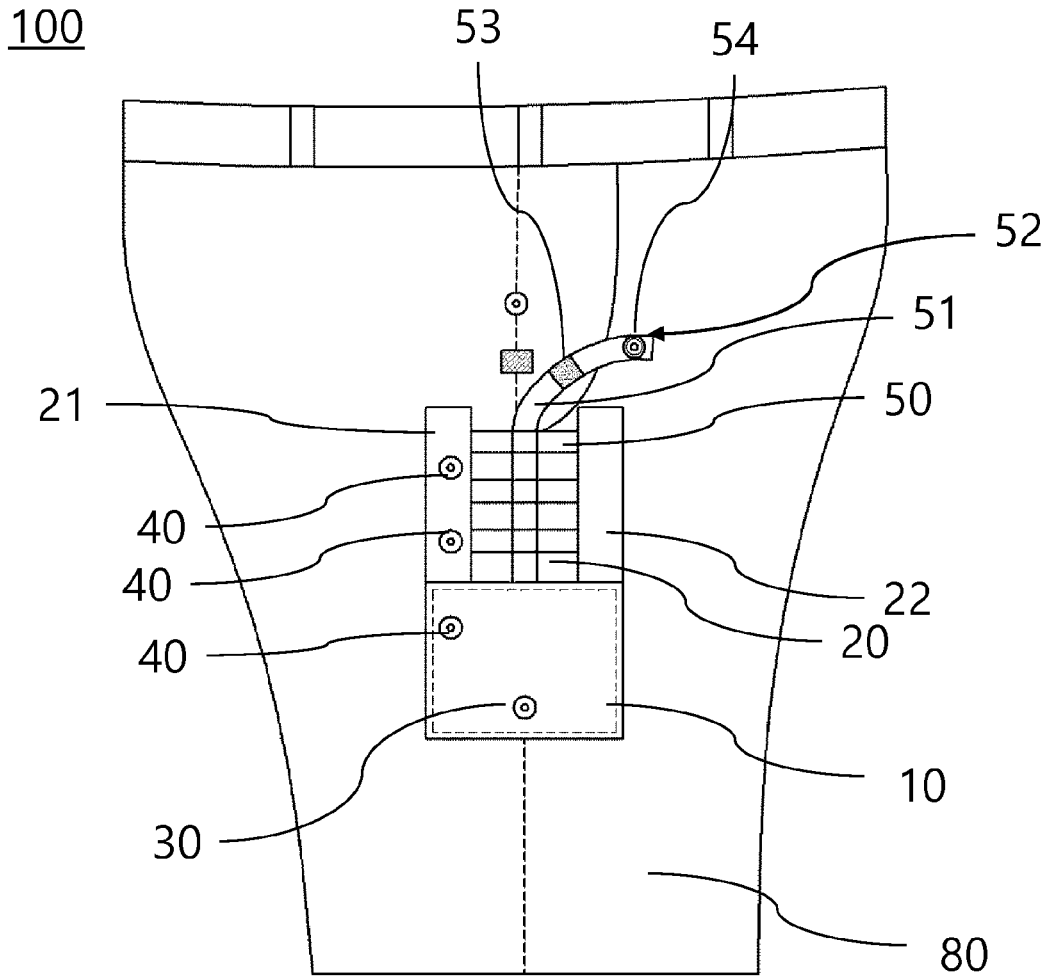
(57) **ABSTRACT**


A pocket for a garment for receiving a mobile electronic device therein includes a lower portion, fixedly attached to the garment, and an tipper portion, fixedly attached to the garment. In addition, the lower and upper portions form the pocket for receiving the mobile electronic device. Furthermore, a depth adjusting means is formed on the lower portion and the garment for vertically adjusting a pocket space and a width adjusting means is formed on the upper portion and the garment for horizontally adjusting the pocket space.
