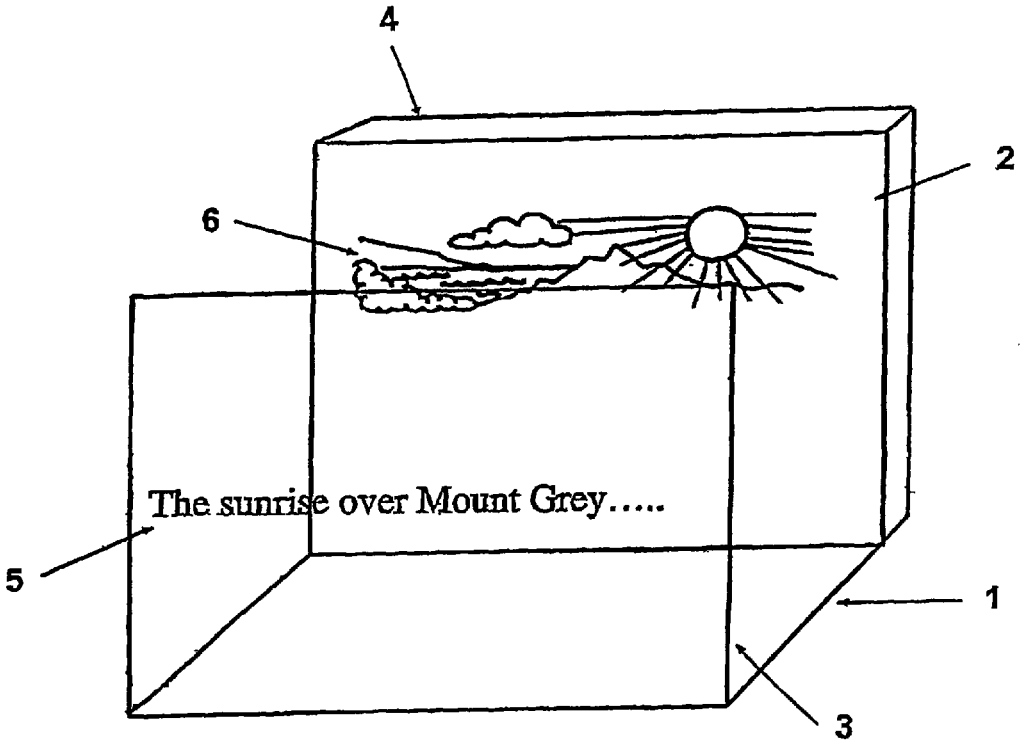
(57) **ABSTRACT**


A method displaying information for viewing by a user characterised by the steps of: peripherally displaying primary information (**5**) on a first focal plane (**3**), and displaying secondary information (**6**) on at least a second focal plane (**2**) to said primary information (**5**), wherein said secondary information (**6**) exhibits at least one characteristic capable of augmenting the effect of the primary information (**5**) on the viewer.
