(57) **ABSTRACT**

Methods, systems, and machine-readable media are disclosed for registering a mobile device for use in a mobile commerce system. According to one embodiment, a method of registering a mobile device for use in a mobile commerce system can comprise receiving at a service provider system a registration request from a user of the mobile device. A determination can be made with the service provider system whether to allow registration of the mobile device. In response to determining to allow registration of the mobile device, the registration request can be sent from the service provider system to an acquirer system.
