

25. The method according to claim 21 wherein the targeted alphanumeric character returns to the first size after being entered.

26. The method according to claim 21 wherein the alphanumeric characters are displayed in a line.

27. The method according to claim 21 wherein the alphanumeric characters are displayed in alphabetical order.

28. A method for entering data into an user interface associated with an electronic device, the method comprising:

displaying with the user interface a plurality of indicia having a first size;

accepting user input via the touch screen that functions to target one of the plurality of indicia; and

displaying the targeted indicia with a second size where the second size is larger than the first size.

29. The method according to claim 28 wherein the indicia comprise alphanumeric characters, symbols and graphic elements.
