

vehicles. For example, the above structures may be moved with rotation, swing, reciprocal movement or vibration in cases that: the special combination is internally won, the special combination is materialized, the number of the combination which is as same as the special combination internally won but not materialized exceeds a predetermined number, the special images are displayed on the display means different from the above structures. And there may be a case that the above structure is constructed from plural members and a part of the members is/are moved. In this case, there may be a case that it can be further expected more various effects by displaying on other than the image display device.

[0109] Further, the front illumination means may be arranged at the front side of the first display means and the second display means. In this case, if the inside of the game arcade is dark, the front illumination means can illuminate both the first display means and the second display means with enough light. Therefore, there may be a case that the player can clearly recognize the images displayed on the display means, thus it can be expected that the player can enjoy more various effects in the gaming machine.

[0110] Although only some exemplary embodiments of this invention have been described in detail above, those skilled in the art will readily appreciate that many modifications are possible in the exemplary embodiments without materially departing from the novel teachings and advantages of this invention. Accordingly, all such modifications are intended to be included within the scope of this invention.

What is claimed is:

1. A gaming machine comprising:

game result display means for displaying a game result thereon; and

beneficial state generating means for generating a beneficial state for a player when a predetermined game result is displayed on the game result display means;

wherein the game result display means includes first display means and second display means arranged at a more front side than a display area of the first display means when seen from a front side of the gaming machine, and

wherein common illumination means for illuminating both the first display means and the second display means is provided.

2. The gaming machine according to claim 1, wherein the common illumination means comprises front illumination means for illuminating the first display means from a front side thereof and rear illumination means for illuminating the first illumination means from a rear side thereof.

3. The gaming machine according to claim 2, wherein the first display means includes a plurality of symbol display parts capable of variably displaying and stopping a symbol or plural symbols, and is constructed so that one of the symbol display parts positioned between the second display means and the common illumination means has light transmittance,

wherein the second display means is constructed from a liquid crystal display device comprising a liquid crystal panel, light guide means arranged at a rear side of the liquid crystal panel, individual illumination means for guiding light to the light guide means and reflection means for reflecting light guided to the light guide means toward the liquid crystal panel positioned at a front side of the light guide means, and

wherein an area of the reflection means corresponding to the symbol display part is made light transmitting part.

4. The gaming machine according to claim 4, wherein the liquid crystal panel is set to normally white.
