

2.4 Short time-out confirms

Application developers can write a confirmation as usual but set a short time-out. In the timeout handler, code is provided to that accept the current value as exact.

5

```
<Speech:QA
  id="QA_Panel2"
  ControlsToSpeechEnable="Panel2"
  runat="server" >
10
  <Confirm timeout="20"
  onClientTimeout="AcceptConfirmation"... />
  <Answer id="CorrectPanel2"
    onClientReco="UpdatePanel2()" >
15
    <grammar src="Panel2.gram" />
    </Answer>
  </Speech:QA>
```

2.5 Dynamic prompt building and editing

The promptFunction script is called after a question control is selected but before a prompt is chosen and played. This lets application developers build or modify the prompt at the last minute. In the example below, this is used to change the prompt depending on the level of experience of the users.

25

```
<script language=javascript>
  function GetPrompt() {
    if(experiencedUser == true)
30
      Prompt1.Text = "What service do you
      want?";
    else
      Prompt1.Text = "Please choose between
      e-mail,
35
      calendar and news";
    return;
  }
</script>
<Speech:QA
  id="QA_Panel2"
```
