

to -4 (as defined in the exceptions possible on
the Start method (section 2.3.1) and Activate
method (section 2.3.4)), and statuses -11 to -15
set on the reception of recognizer events (see
5 2.4).

2.3 Object methods

Reco activation and grammar activation may be
controlled using the following methods in the Reco's
DOM object. With these methods, uplevel browsers can
0 start and stop Reco objects, cancel recognitions in
progress, and activate and deactivate individual
grammar top-level rules (uplevel browsers only).

2.3.1 Start

The Start method starts the recognition process, using
3 as active grammars all the top-level rules for the
recognition context which have not been explicitly
deactivated.

Syntax:

) Object.Start()

Return value:

None.

Exception:

The method sets a non-zero status code and
fires an onNoReco event when fails. Possible
failures include no grammar (reco status = -
1), failure to load a grammar, which could
be a variety of reasons like failure to
