

Event property (in ECMAScript)	Object.onSilence = <i>handler</i> Object.onSilence = GetRef("handler");
--------------------------------	---

Event Object Info:

Bubbles	No
To invoke	Recognizer did not detect speech within the period specified in the initialTimeout attribute.
Default action	Set status = -11

Event Properties:

- 5 Although the event handler does not receive properties directly, the handler can query the event object for data.

2.4.3 onTimeout

onTimeout handles two types of event which typically
10 reflect errors from the speech platform.

- It handles the event thrown by the tags interpreter which signals that the period specified in the maxtime attribute (see 2.2.1)
15 expired before recognition was completed. This event will typically reflect problems that could occur in a distributed architecture.
- It also handles (ii) the event thrown by the speech recognition platform when recognition has
