(57) **ABSTRACT**

A video display system comprising a housing, a flat panel display, a memory storage module for storing data representative of an audio/video sequence, and a user input interface operable to cause the audio/video sequence to be visually displayed and audibly reproduced. In an illustrative embodiment of the present invention, the video display system is employed in a bound hybrid document such that the stored video sequence forms a part of the hybrid document. A plurality of aligned apertures are defined in the housing to accommodate the integration of the video display system within the bound hybrid document.
