

**90.** A gaming machine comprising:

a processor controlling the operation of a wagering game;  
and

a rotatable flat panel transmissive display coupled to the processor, wherein the transmissive display may be rotated from a substantially horizontal position for playing the wagering game.

**91.** A gaming machine comprising:

a cabinet including a primary game display operable to display the outcome of a wagering game in response to a wager;

a flat panel transmissive display mounted to the cabinet and operable to display signage information.

**92.** The gaming machine of claim 91, wherein the signage information includes advertising information.

**93.** A gaming machine comprising:

a primary game display operable to display the outcome of a wagering game in response to a wager;

a top box display associated with the primary game display; and

a transmissive display overlaying the top box display and operable to provide images overlaying selective portions of the top box display.
