(57) **ABSTRACT**

(22) Filed: **Aug. 27, 2015**

A print display of words is presented in a display at a user device. An audio electrical signal is generated based on utterances of a user in speaking a word of the words. The utterances are matched to the word using the audio electrical signal and word associated utterance data. An emphasis display signal is generated based on the matching of the utterances to the word. A visual reference of the word is emphasized at the display based on the emphasis display signal.
