(57) **ABSTRACT**

A method and system for assigning screen designation codes is disclosed. A method of assigning screen designation codes includes assigning a first screen designation code to a first spreadsheet object, wherein the first screen designation code is associated with a first display screen of a multi-component display. A second screen designation code is assigned to a second spreadsheet object, wherein the second screen designation code is associated with a second display screen of the multi-component display. The first and second screen designation codes are operable to implement a simultaneous display of the first spreadsheet object on the first display screen and the second spreadsheet object on the second display screen.
