(57) **ABSTRACT**

A compact retractable label assembly includes a flexible label tongue and a guide bracket for receiving the label tongue. The guide bracket is adapted to mount to the inside of an enclosure surface such that the label tongue may be pulled from a mouth of the bracket to the outside of the enclosure surface. The guide bracket has a curved profile so that the label tongue bends when it is pushed inside the enclosure. The bend in the excursion path of the label tongue preserves space inside the enclosure.
